

APPLICATIONS

Eni Eco Lube MS is a special biodegradable lubricant formulated with natural quality esters and anti-wear additives that make it particularly suitable for manual or automatic lubrication of chain saw.

CUSTOMER ADVANTAGES

- Long life and excellent lubrication of the chain are ensured by the high lubricity characteristics of the product, even in severe working conditions
- The high speed centrifugation doesn't disperse the product thanks to the excellent adhesive properties obtained with a special additive which keeps it effectively anchored to the chain
- Protection of the circuit and metal parts thanks to its anti-corrosive and anti-rust properties
- It contributes to the preservation of the environment as biodegradable according to the CEC L-33-A 94 test to more than 90%

CHARACTERISTICS

Properties	Method	Unit of Measure	Typical
Appearance	-	-	clear
Density at 15°C	ASTM D 1298	kg/m ³	920
Viscosity at 40°C	ASTM D 445	mm ² /s	46
Viscosity Index	ASTM D 2270	-	210
Flash point (COC)	ASTM D 92	°C	260
Pour point	ASTM D 97	°C	-24
